

Business Opportunity for General Practitioners across Australia

Since 1985, Medvet has grown to become a national provider of on-site health and safety services delivered by qualified and experienced health professionals to businesses all over Australia.

Medvet offers a range of services nationally to a wide range of industries at their workplace including:

- On-site Employee Vaccinations
- Drug and Alcohol Policy, Programs and Testing
- Drug and Alcohol Testing Products
- Education and Training
- Food, Pharmaceutical and Environmental Testing

In preparation for the 2016 influenza season and with the support of the AGPN, we are seeking general practitioners willing, available and enthusiastic about providing influenza vaccines to Medvet's corporate customers and their employees at their place of work. The majority of vaccination clinics are scheduled between business hours Monday-Friday and clinics are generally in or close to the main capital cities. There are also opportunities in regional locations throughout Australia.

GP's will be expected to vaccinate groups of employees in a range of locations and following completion of each vaccination, submit a relevant claim to Medicare based on a short consultation outside of the surgery. This entitlement will be considered full remuneration to each doctor. All Medicare claims will be the responsibility of each doctor.

All vaccines and consumables will be supplied by Medvet and delivered to you directly from Medvet's vaccine distributor/supplier at an agreed arranged time.

If you have an interest in immunisation, enjoy a 'hands on approach' and can offer good availability to Medvet from March until June 2016 then we would love to hear from you.

Please contact Ms. Jill Kirkwood at jkirkwood@medvet.com.au or 1800 633 838 for further discussion surrounding this opportunity.
